

***Esther, Nick and Lajos (off: presentation of unpublished material) "A glimpse into the dossier of Iordanes, pagarch of Hermonthis: preliminary presentation of selected texts"**

We present the first preliminary results of our ongoing study on the dossier of Iordanes, pagarch of Hermonthis that dates to the second part of the seventh century. It consists of letters mostly written in Coptic and, to a lesser extent, of Greek accounts and offers thus a welcome comparandum to the documents of the Papas archive. Our presentations will focus on taxation and the contacts of Iordanes with the Arab administration and neighbouring pagarchies.
